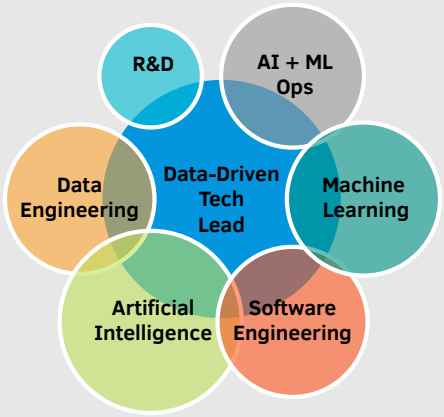
Skills

Overview



Programming

$0 \longrightarrow 10,000+\ HW\ LOC$

Python • Databricks • PyTorch • AWS

JS • CUDA • LangChain • Local AI

Pinecone • AgentOps • MCP • Pydantic

Recent Projects

Multi-Agent Insurance Claim Autorep (MAICA)

- Multi-agent capstone project for Google AI Agents Intensive bootcamp.
- Designed using Google ADK; comprising 6 base agents + 2 orchestrator agents for optimal motor insurance claim processing.

deepmint.ai (build phase)

- Immutable AI-ranked analyst tracker that scrapes the web daily for analyst predictions and computes temporal ratings.
- Built to keep market analysts honest, verify track records and connect traders/investors to trusted sources.

Summary

- Scientist-Builder turning data into decisions and production impact.
- 20 years software development experience; 8 years ML + AI technician and leader.

Experience

Dec 2025 - Present — **Head of Engineering** — **We are Eden**
- Leading build-out of pioneering agentic AI medico-legal platform.
- Architected **agentic AI** stacks navigating complex requirements.
- Owned **'token vs cash' unit economics** and budgeting end-to-end.
- Established **Responsible AI** guidelines, DPIA, data governance.
- Built and mentored **cross-functional distributed engineering** team.
- Highlight: Cutting regulatory compliance time from **1 year to 1 day**.

Jun 2024 - Present — **Principal AI Engineer** — **Codeblock Labs**
- Designed and deployed **end-to-end multimodal genAI** software.
- Bridged **frontier research** and **enterprise value** in production.
- Led AI strategy in **regulated environments** under consulting model.
- Established guardrails, evals and governance aligned to **EU AI Act**.
- Senior **technical voice** to executives, investors and customers.
- Highlight: **(0→1→scale)**; major releases weekly; 99.99% uptime.

May 2022 - May 2024 — **Lead Data Scientist** — **AXA UK**
- Owned full DS lifecycle, operationalising business **ML pipelines**.
- **Hired and line-managed** junior DS to increase data-driven value.
- Highlight: Shipped ML/AI algorithms **reduced costs** by £10m+.

2017 - 2022 — **Research Engineer** — **Infineon Technologies**

2014 - 2016 — **Software Engineer** — **Masra Consultancy**

2011 - 2014 — **Business Support Consultant** — **Direct Line Group**

2010 - 2011 — **Insurance Sales Consultant** — **Royal Bank of Scotland Group**

2009 - 2010 — **Software Engineering Intern** — **Doctor Shush Solutions**

2008 - 2009 — **Website Development Intern** — **South West Pony Association**

2006 - 2008 — **Website Development Intern** — **Various (through Weston College)**

Education

Dec 2024 — **PhD, Computer Science** — **University of Bristol**
Intelligent Testing for Simulation-Based Verification of Complex Industrial Hardware. Researched new AI applications for chip logic.

Jul 2017 — **MSc, Advanced Computing** — **University of Bristol**

Memberships & Certifications

2026 — **PRINCE2 Project Management Foundation** — **PeopleCert**

2026 — **Microsoft Certified: AI Agent Builder Associate** — **Microsoft**
